Subject: Assault Weapons, HB-5415 and HB-5416

It is imperative to stop the rising number of murders in this country, not the effect of war but of everyday anger armed with weapons of unconscionable power. Please use all your legislative power to support HB-5416 and oppose HB-5415. In this country of alleged equal justice, we should never see the easy murder, especially of people of color, that occurs in our streets more and more often. These are weapons of war. We are not at war.
